

**App for recording
trails and sharing
hiking experiences
among the
mountaineering
community of the
Balkans.**

Story 0

“A user can register and then log in”

- When registering, the user needs to provide following information:
 - Username
 - Email
 - Photo (optional)
 - Location
- After clicking the “Register” button user is taken to the feed page and profile is created.

Story 1

“After logging in, a user can record a hike activity and save the route as a gpx downloadable file.”

- Initially user registers and once the account is created, the user can then log in and record the hiking activity by clicking the “Record Activity” button which is present at all times.
- After the activity has been recorded (calculated distance and elevation), the user can “Save” it and enter the following information:
 - Technical difficulty (1-10)
 - Condition difficulty (1-10)
 - Description (Optional)
 - Images (Optional)

Story 2

“A user can scroll down the feed to see other users’ activities, leave a comment, like, save the route in personal archive and download a gpx file”

- Once a user logs in, the feed contains recent recorded activities of other users.
- User can filter activities based on location, difficulty and distance.
- By saving a route, the user can later access it within personal profile by clicking the “Archive” button.
- By clicking on the username of another user in the feed, a user can visit ones profile and see recorded activities.

Story 3

“A user can follow another user”

- User can follow another user by visiting the “Explore” page.
- Another user could be found by either typing the username or based on suggestions (those with similar recorded activities, nearby, most shared followers, etc)

Story 4

“On the personal profile page, a user can access previously recorded activities, see personal statistics of the current month and visit archive”

- By clicking the “My Profile” button user is taken from the feed page to the profile page.
- The user can see the distance graph of the current month, number of followers and those followed and can click the “Archive” button to go to the page containing previously marked, favorite routes of other users.
- Profile also contains information about the total number of routes recorded.
